Four Principles for Jump-starting Performance Improvement - Satellite vs. 30,000-foot Metrics

May 13, 2008 | Author: admin | Filed under: Quality Management, Project Management Best Practices

Four Principles for Jump-starting Performance Improvement - Satellite vs. 30,000-foot Metrics (#3 in the series Four Principles for Jump-starting Performance Improvement)

By Forrest W. Breyfogle, III

For any organization to be successful, it's necessary for meaningful metrics to be taken at two levels. They are (1) measurement of operational level components throughout the enterprise, or what we call 30,000-foot level metrics, and (2) measurement of the factors that affect overall corporate financials, or satellite level metrics. Both 30,000-foot level and satellite level metrics assess the overall enterprise system; there are no calendar boundaries

The 30,000-foot level metrics measure, for example, asset management, people development, factory productivity (percent yield, run time productivity), supply chain dynamics, salesperson productivity, safety, new product introduction and suppliers (cost, quality, service), etc. These metrics influence and determine individually and collectively the bottom-line results for the whole corporation.

Satellite-level metrics include measurements such as return on invested capital, earnings before interest depreciation and amortization, operating income and net profit margin, as well as market dynamics that determine the overall performance of an enterprise.

Forrest W. Breyfogle, III, is the founder and CEO of www.smartersolutions.com, an Austin, Texas-based company. He has authored and co-authored 11 books and published over 80 technical resources for well known, worldwide publications on Six Sigma, Lean Six Sigma and Lean methods. In 2004, he was the recipient of the American Society for Quality Crosby Medal for his book, "Implementing Six Sigma," 2nd edition. Breyfogle is an ASQ Fellow and a member of the board of advisors for the University of Texas Center for Performing Excellence.

Smarter Solutions maintains an articles section, which can be found at http://www.smartersolutions.com/articles.php.

About the Author Forrest Breyfogle, III Integrated Enterprise Excellence

In a professional career spanning over a quarter century, Forrest Breyfogle has established himself as a leading edge thinker, a prolific author, an innovative consultant, a world-class educator, and a successful business executive. His work is documented in eleven books and over ninety articles on the topic of quality improvement.

A professional engineer, Forrest is also a member of the board of advisors for the University of Texas Center for Performance Excellence. He is the founder and CEO of Smarter Solutions, Inc., an Austin, Texas based consulting firm offering business measurement and improvement consultation and education to a distinguished list of clients worldwide, including BAMA, CIGNA, Dell, HP, IBM, Oracle Packaging, Sherwin Williams, Cameron, TIMET, and TATA. He served his country on active

duty in the US Army for 2 years, and has played an active leadership role in professional and educational organizations. Forrest received the prestigious Crosby Medal from the American Society for Quality (ASQ) in 2004 for his book, *Implementing Six Sigma* (second edition). This award is presented annually by the American Society for Quality to the individual who has authored a distinguished book contributing significantly to the extension of the philosophy and application of the principles, methods, or techniques of quality management

He is a widely recognized authority in the field of management improvement and is a frequent speaker before professional associations and businesses. His earlier work in the field of management science has been widely acclaimed. A previous book, *Implementing Six Sigma*, sold over 40,000 copies and still ranks among the top Amazon books in Applied Mathematics/Engineering Statistics and Industrial Engineering /Quality Control.

He founded Smarter Solutions in 1992 after a 24-year career at IBM. The associates of Smarter Solutions specialize in helping companies throughout the world improve their bottom line and customer satisfaction through the implementation of techniques that are beyond traditional Lean Six Sigma and the balanced scorecard methodologies. His latest and most extensive work has been in the documentation of a new system of enterprise management, the Integrated Enterprise Excellence (IEE) system, in a series of four books. IEE provides a detailed roadmap that builds on and integrates the best practices of earlier disciplines like Six Sigma, Lean, TQM, PDCA, DOE, and TPS combined with innovative analytical tools to produce improvements at the highest level of an enterprise.

In addition to assisting hundreds of major clients in the wise implementation of improvement systems worldwide, Forrest has also developed over 300 hours of classroom instruction used to train executives, managers, and Black Belt practitioners to plan for, implement, and manage IEE systems. He also leads formal seminars and workshops worldwide.
