

FOR IMMEDIATE RELEASE

Free 30,000-foot-level Reporting Software APP

(Austin, TX – August 1, 2020) *Management 2.0: Discovery of Integrated Enterprise Excellence* (<https://www.amazon.com/dp/B08FL2L2Y6/>) and *Leadership System 2.0: Implementing Integrated Enterprise Excellence* (<https://www.amazon.com/dp/B08HFKPSCQ/>) describe and show the benefits of reporting the output of processes at their 30,000-foot-level.

This free business process management 30,000-foot-level reporting software app (<https://www.smartersolutions.com/free-business-process-management-software>), which the books reference in their appendices, can provide a prediction statement for stable output response processes. When an Integrated Enterprise Excellence (<https://www.smartersolutions.com/services/business-system-iee/integrated-enterprise-excellence>) high-level (or 30,000-foot-level) process management response is undesirable, this unsatisfactory response “pulls” for the creation of an improvement project.

This free Enterprise Performance Reporting System (EPRS) software app, for example, can create the 30,000-foot-level figures shown in the books *Management 2.0* and *Leadership System 2.0*.

Software is available which provides a behind-the-firewall implementation of an IEE Performance Reporting System (EPRS) in an organization (<https://www.smartersolutions.com/integrated-enterprise-excellence-iee-business-management-system-software>). Among other things, there can be an automatic updating of the organization's 30,000-foot-level report-outs, e.g., daily.

###
